**Client**  
AA Projects

**Location**  
Slough

**Project Value**  
£800k

**M + E Value**  
£600k

## Marish School

### Project Brief

Electrical refurbishment of a secondary school. Stanton Consulting were responsible for:

- In-depth site surveys to ascertain extent of existing systems.
- Complete design of:
  - Small power
  - Lighting and emergency lighting
  - Fire alarm systems
  - External lighting

### Solutions

A challenging project due to the requirement to keep the school open whilst works were completed. Working closely with the client and all contractors ensured we were able to devise a phased programme that enabled a successful completion.
