Bentley Motors

Project Brief

We were engaged to carry out the M&E design for a new Painted Body Store within the Crewe facility of Bentley Motors.

The scheme involved the verification and utilisation of existing utilities including :

Gas Infrastructure

LV Infrastructure

within a live operational environment. It was important that any shutdowns were planned in conjunction with factory personnel to minimise disruption and ensure smooth handover of the systems.

Additionally, we were also responsible for the design of the heating and ventilation systems to this facility .
