Aberystwyth University

Location
Aberystwyth

Project Value
£ 45 M

M + E Value
£ 15 M

M + E Contractor
Balfour Beatty

Contractor
Balfour Beatty

Aberystwyth University

Project Brief

To provide independent witnessing support to the client to ensure a compliant and cost effective mechanical & electrical installation

Solutions

Engaged over all 3 phases of the scheme we provided on site and office based support to the university to ensure that the scheme was installed and commissioned to the required codes standards.

A logistically challenging scheme - due to location and major overruns from the main contractor, Stantons were still able to provide a comprehensive solution and to challenge the contractors on the clients behalf.

Main client benefit was the identification of a major legionella risk, which - had it not been spotted by ourselves - could have resulted in major consequences.
