

Summary

Client

Ben Bailey Homes

Location

Stoke-on-Trent

Project Value

£2m

Contract Start

July 2010

Contract Completion

December 2011

Wedgewood Gardens

Project Brief

The scheme involved the re-use and refurbishment of the original Twyford's factory in the heart of Stoke-on-Trent.

We were responsible for the full design of Mechanical and Electrical services to convert this listed building into residential apartments. Working in conjunction with the architect and conservation officer, we were responsible for the design, development and specification of:

- Lighting
- Small pave
- Ventilation systems
- DHCWS
- Heating systems.

In addition to ensuring a sympathetic design we were also responsible for ensuring that the new development fully complied with part 2 of the building regulations.
