Miller Construction

IMAGINATION TECHNOLOGIES

Project Brief

The first of a three-phase campus development for the multimedia and communication technologies company. The new headquarters building is situated on a former industrial site adjacent to the Grand Union Canal.

Solutions

A 3 storey office block, services included :

- Site services maximum demand reports
- Dynamic Simulation Thermal Model incl EPC generation
- Full design of ME&P services including :
 - HVAC
 - Public Health Engineering
 - Electrical
 - Utilities
 - Co-ordination Drawings

The design was completed, under challenging circumstances & timescales, on time.

We also assisted in Value Engineering the original design into a more affordable budget.
